

Lewelling Park

Constructing Entire Community Parks Throughout the Portland Metro Area

2006 & Spring 2007

We constructed this entire park for the City of Milwaukie. It was based on a Green Works Design and involved site excavation, grading, soil preparation, asphalt, concrete, installation of a complete irrigation system, lawns and planting. Constructing this children's park gave us experience with working in high traffic areas, BOLI prevailing wage rates, and our understanding of City Permits and Procedures.

Certified Play Structure Installer

- We are a preferred installer for Kompan. We have successfully installed many play structures and constructed parks around the Portland Metro area. We have experience in rubber matting/tiles, softfall, etc.

Park Shelter

- Furnish and Install Park Shelter with a Concrete Slab Patio

Site Furnishings

- Park Benches
- Wood Bridge Connecting Portions of the Asphalt Roadway
- Play Structures
- Trash Receptacles
